Hague Quality Water
2125 Buckskin Dr.
Los Osos, CA 93402

Attn: Richard Foronjy

Dear Richard,

When I saw you at the Madonna Home Show I was interested in the filtration system for the sink. I had been purchasing distilled water for a number of years at \$.70 per gallon plus the California deposit and the gas to go to the store to get the distilled water each week. It was costing close to \$1.00 per gallon. Now that I have the system on my sink, I get water very close in purity to the distilled water whenever I want it. My ice cubes are no longer opaque but crystal clear and they don't smell.

At the time you came for the demonstration I had a water softener that stood away from the wall in the garage. I added a bag of salt every 6 to 9 months but I still had hard water stains in the toilets. Each time there was a power failure, I would get hard water into the system making the water softener ineffective. The manual resetting of the timer was inconvenient. When you tested my water, I was surprised how "dirty" it was. But since we use well water most of the time, I shouldn't have been surprised. Since I had the Hague filtration system installed I have noticed my skin is softer. Whenever I get a scratch I wash it with soap and water before putting on a dressing. I have noticed that I am having fewer infections and don't have to use antibiotic creams on wounds. I assume the cleaner water is cleaning the wounds and not adding "stuff" to the wound that prevents healing and may cause infections.

My dishes used to come out of the dishwasher dirty when I had the water softener. Now using less detergent, my dishes are beautifully clean. Even the "etching" is being removed indicating it was hard water film. I used to itch when I would get out of the shower. Now my skin is soft and I want to get right back in. It is hard to believe the difference the Hague filtration system makes. I'm glad I stopped at your booth at the Madonna Home Show.

Sincerely,

Joyce Roark

To Whom It May Concern:

We are delighted with our Hague Quality Water System. Not only do we feel better just knowing that our water is clean and healthy, we also have noticed since the Water System has been installed and our icemaker hooked up to it, that the swelling in our ankles has disappeared. We have soft water and even though we were buying our drinking water from the grocery store, we were using ice cubes that were made with soft water. Our conclusion is that the salt in the ice cubes was causing our ankles to swell.

Our Hague Representative, Richard Foronjay was most helpful in his presentation of this product and we heartily endorse the Hague Quality Water System and Richard. We feel that everyone would benefit by just learning about it.

Sincerely,

Jack and Kay Washburn
