Los Osos CA 93402

Dear Dan;

I want thank you for helping me solve my water softener problem.

I had an old water softener that quit working. I have had a Hague reverse osmosis system for a few years and enjoy the very good tasting water that provides, so when I needed a new water system for the rest of the house, I knew your company could provide a very good system.

I don't know how long my old water softener wasn't working properly, but my skin had become dry and especially my scalp. I thought it was because I had been using the heater more, but since your system has been installed, my scalp is no longer itching and the rest of my skin is better.

Blessings to you,

Sharon Collester
